### ABOUT ME

I'm a dedicated Full Stack Developer with practical experience in building modern web applications using Next.js, React, and Tailwind CSS. I write clean, maintainable code in JavaScript and TypeScript, and manage state efficiently using Redux Toolkit. On the backend, I use MongoDB with Prisma ORM for robust database solutions. I've implemented secure, scalable authentication systems using NextAuth. I enjoy turning complex problems into simple, user-friendly interfaces.

### EDUCATION AND TRAINING

11/2019 – 11/2023 Faisalabad, Pakistan

**BS INFORMATION TECHNOLOGY** Government College University Faisalabad

**Website** <https://gcuf.edu.pk/>

08/2017 – 07/2019 Muridwala, Pakistan

**FSC PRE-ENG** Superior College Muridwala

03/2015 – 03/2017 Mamunkanjan, Pakistan

**MATRIC** Dar-e-Arqam School

### WORK EXPERIENCE

**AG INFO TECH** – ISLAMABAD, PAKISTAN

**FRONT END DEVELOPER** – 10/2024 – CURRENT

- Building Interactive UI – I develop dynamic and reusable UI components using React.js and other modern frameworks.
- State Management – I manage application state efficiently using Redux Toolkit (RTK) to enhance performance.
- Performance Optimization – I optimize front-end code to improve speed, SEO, and accessibility.
- API Integration – I consume and integrate REST APIs and GraphQL endpoints to fetch and display dynamic data.
- Responsive Design – I ensure that applications work seamlessly on different screen sizes using CSS, Tailwind, and Styled Components.
- Code Maintenance & Best Practices – I write clean, maintainable, and scalable code following industry best practices.

**TECHLOSET SOLUTION** – FAISALABAD, PAKISTAN

**FRONT END DEVELOPER** – 05/05/2024 – 10/11/2024

- Developed and maintained responsive web applications using Next.js and React.js.
- Collaborated with UI/UX designers to implement modern, user-friendly interfaces.
- Improved performance and code quality through component reusability and optimization.

HTML | CSS | JavaScript | Tailwind | Bootstrap | React | React.js | Git | Node.js | MySQL | Redux | Redux Tool Kit | Postman | TypeScript | Next.js | MongoDB

## PROJECTS

---

06/2024 – 08/2024

### Swift CRM (E-commerce Platform)

---

**Tech Stack:** Next.js, Tailwind CSS, Prisma, MongoDB, NextAuth

- Developed a CRM and e-commerce website where users can sign up, log in, and reset passwords via Gmail integration.
- Implemented full product management features, including adding, editing, and deleting products.
- Integrated order tracking with status updates (pending, delivered).
- Created an intuitive user settings interface for changing profile pictures and updating passwords.
- Visualized sales data using dynamic charts, with the ability to filter results by date ranges.
- Designed a responsive interface using Tailwind CSS to ensure optimal user experience across all device

04/2024 – 05/2024

### E-commerce Website (E-Mart)

---

**Tech Stack:** React, Firebase, and Framer Motion

- **User Authentication** – Users can sign up, log in, and manage their profiles securely.
- **Product Management** – Admins can add, update, or delete products from the inventory.
- **Smart Cart System** – Users can add products to the cart and place orders based on availability.
- **Real-Time Order Tracking** – Admins can track and update the status of customer orders.
- **Dynamic Product Display** – Products are shown to users based on availability in the database.

07/2025 – 08/2025

### Job Portal (Hirred)

---

**Tech Stack:** Next.js, Tailwind CSS, Supabase, Clerk

- **Role-Based Access** – Recruiters and candidates have separate, dedicated dashboards.
- **Recruiter Panel** – Recruiters can add companies and post jobs easily.
- **Application Management** – Recruiters can view which candidates have applied to their job posts.
- **Job Listings for Candidates** – Candidates can explore jobs from multiple recruiters and apply directly.
- **Secure Login/Signup** – Authentication system for safe and personalized user experience.
